

UpdateStar Repair 9 now with real-time maintenance and Windows 10 optimization

UpdateStar Repair 9 is the latest product in the portfolio of products of Berlin-based software company UpdateStar. Repair is the all-in-one product to keep a Windows computer in shape - now with real-time monitoring and Windows 10 optimization. Computer maintenance is important for every computer user for many reasons such as overall performance, security and stability. UpdateStar Repair 9 safely tackles these issues with 20 diagnostics and repair modules.

Berlin, August 11, 2016 – UpdateStar, a leading German software product and services provider with more than 10 million monthly users, announces the release of UpdateStar Repair 9. The new product version now offers real-time monitoring and maintenance for Windows based computers.

Computer users know how it feels when the computer is getting slower and slower the longer they use it. These problems may be caused by the amount of clutter on the computer, as well as invalid registry entries, plus huge amounts of fragmented files, and incorrect network or system settings, and a number of other things. Repair runs checkups of the entire system, finds the issues and problems and solves these safely.

Repair includes 20 diagnostics and repair modules. It allows users to defrag hard disks, clean out junk and repair registries, clean up web browsers to help protect privacy, recover deleted files and so much more.

Important modules and features at a glance

- Scan, identify and solve issues behind reduced performance
- Defrag the hard disk drive
- Clean out junk and repair registry
- Speed up the computer and clean up web browser left-overs
- Protect users privacy
