

Update Windows device drivers with the new UpdateStar Drivers 9

UpdateStar Drivers 9 is the latest product update in the portfolio of products of Berlin-based UpdateStar. Device driver updates are important for every computer, because outdated drivers can create many problems like functionality and stability issues. The Drivers 9 update service provides users with driver updates from a database with now more than 171,000 hardware devices.

Berlin, November 17, 2016 – UpdateStar, a leading German software product and services provider with more than 10 million monthly users, announces the release of UpdateStar Drivers 9. The enhanced database of new version informs about available device driver updates for the installed drivers on a Windows computer.

The included service offers daily scans for newly available device driver versions. The software offer the download and installation of these newly available driver versions. Additionally users may create backups of their existing drive base and also have the option to ignore specific driver updates, if the user wishes to keep a specific version of a driver running on the computer.

The updated database recognizes 171,000 hardware devices and offers drivers downloads using original manufacturer sources for now more than a million device drivers.

Important features at a glance

- Automated daily or manual scans for device driver updates
- User-friendly interface to scan, download and install new drivers
- IMPROVED! Enhanced database supports more than 171,000 hardware devices
- IMPROVED! Database service updated daily by automated crawlers, electronic driver file analysis, and manual reviews
- Fast driver downloads using our storage infrastructure for optimal download speed and availability

Prices and trials
