

Stay up to date and secure with your software

UpdateStar 11 offers you a time-saving, one-stop information place for your software setup and makes your computer experience more secure and productive. UpdateStar delivers updates for your freeware, shareware, demos, commercial software, and includes special offers.

UpdateStar prevents instability, vulnerability and potential downtime of workstations and servers in the first place! UpdateStar Premium protects corporate Windows computers and Windows servers from vulnerabilities caused by outdated software. The high number of new software updates and patches published by software vendors shows how important it is to take care of software setups on a 24x7 basis. UpdateStar Premium provides administrators with information for more than 1,746,000 software products.

Protect yourself against outdated software

Outdated software can lead to problems and system crashes and may lack features you can find in up to date versions of your software. Old software can even leave you vulnerable to attacks from outside as the constant news flow about newly found vulnerability leaks in software applications shows. UpdateStar puts a stop to that!

Complete software management

UpdateStar acts as an enhanced replacement for the well known "Add or Remove Programs" or "Programs and Features" within your Windows Control Panel.

Use cases

Outdated software is a security and performance problem for every computer user. Each day many, many updates for software products are published by software vendors. The reasons can be security issues as well as newly added features.

Users typically use UpdateStar best for one of the following three reasons:

1 Users with an existing PC and software setup

UpdateStar acts as the perfect add-on to the Windows Update Service. UpdateStar provides users with added security, as it helps to keep all third-party software installations on your computer up to date. Plus users get a complete software management tool with security analysis, 24x7 scheduler, reliable downloads, access to the largest software database and more.

2 Users with a new Windows computer

UpdateStar is the perfect tool to fit up your computer with software. With UpdateStar you find and download all of your accustomed software titles and additionally search and find new software from our broad database of software titles.
